		Injuries	Crop Dmg	

The tornado touched down on in an open field on the south side of Huntingburg. It moved northeast into a residential area, uprooting and snapping numerous large trees and doing roof damage to homes and garages on the west side of Highway 231. It damaged the roofs of several businesses along the highway before striking a mobile home park, where it completely destroyed two homes, and heavily damaged several more. Continuing into a neighborhood of wood-frame homes, the tornado destroyed two more garages - one constructed of cinder blocks - and did minor to moderate roof damage as well as snapping and uprooting trees. The twister then passed just north of the city's Municipal Park and over its water treatment facility, snapping and uprooting trees before crossing over an open field and dissipating near Highway 64 approximately 1 mile east of Huntingburg.

### DUBOIS COUNTY --- 1.4 W HAYSVILLE [38.48, -86.95], 0.7 NE HAYSVILLE [38.49, -86.91]

05/25/11 20:54 EST 30K Tornado (EF1, L: 1.87 mi , W: 60 yd) 05/25/11 20:55 EST 0 Source: NWS Storm Survey

The tornado touched down in an open field 1.6 miles west of Haysville, destroying a metal outbuilding. After traveling over primarily open farmland - snapping trees in wooded areas along the way - the tornado entered the west side of Haysville. It uprooted and snapped the trunks of several more trees before tearing off the roof of a modular home just north of St. Paul's Lutheran Church. The tornado continue east of Highway 231, snapping trees and downing power lines before dissipating in an open field east of town.

(thoughbefore estroying an An EF-1 Tornado touched down 1.6 miles west of Haysville and lifted just east of Haysville.

#### ORANGE COUNTY --- 1.3 SSW ORLEANS ARPT [38.63, -86.46], 0.8 WSW LEIPSIC [38.66, -86.38]

This tornado touched down along Highway 37 south of Orleans, uprooting and snapping several trees. It expanded to its maximum width and strength one mile into its path, where it heavily damaged two brick homes and one wooden frame home, as well downing power lines and poles. In this area it also did extensive damage to several outbuildings, completely destroying one barn and overturning a tractor within. The tornado continued to the northeast, damaging another outbuilding a mile to the northeast and uprooting and snapping numerous trees before finally lifting in an open field 3/4 mile southwest of the community of Leipsic.

Beginning in an open field less than a quarter of a mile south of the Orange/Lawrence County line, this tornado tracked northeastward for 3.2 miles across portions of three counties. Near its touch down 3.1 miles northwest of Saltillo, it destroyed a large wooden barn and uprooted several trees on the south side of Suddarth Ln before entering Lawrence County. It had a path length of 0.3 miles in Orange County.

This is the final stretch of the tornado that originated in Orange County, 3.1 miles northwest of Saltillo. After clipping the extreme southeast portion of Lawrence County, it entered Washington County just south of East County Road 700 North and tracked northeastward for another 1.2 miles before dissipating at Spangler Hill Road. It caused EF-1 damage to numerous trees before lifting. The tornado's total path length was 3.2 miles.

Several trees were downed across the county.

Warm humid air overspread the Ohio Valley ahead a a strong closed low located over Missouri. By late afternoon on the 25th, discrete supercells over western Kentucky were beginning to congeal into a squall line. Later in the evening and throughout the early morning hours, a squall line crossed central Kentucky. Widespread wind damage occurred along and west of Interstate 65, with isolated damage east of the Interstate. A portion of this line of storms developed into a bow echo that brought damage along the Kentucky Tennessee border.
